[Campisode #10](#): Draw her life with Lindsey Rustad, an USDA Ecologist

[The GEM Sister Lasso Lizards At Biosphere 2](#): GEM Sisters explore the different ecosystems within the Biosphere 2 and meet Earyn McGee, a Herpetologist who shows the girls how to lasso lizards in order to capture, tag, and research them in their natural habitats.

[Hayley LeBlanc Leans to Save Wild Animals](#): Watch along to meet a Computer Programmer using drones to help stop poachers in Africa and a Large Carnivore Ecologist who studies the biology and ecology of wild animals like bears or lions to help save them from extinction.

[Karina Garcia Sends Her Sister on a Slime Adventure](#): Learn the difference about the slime slugs and snails make compared to man-made slime that's manufactured and sold in stores!

[Will A Snake Bite You If You See It In the Wild? Find Out From Conservation Biologist, Sam Wynn](#) Learn about the tools Sam uses to safely catch snakes and the data she gathers to track and study them.

[How Can Coding Save Orca Whales?](#) Research Software Engineer Gracie Ermi talks about how she writes machine learning code to build AI that Scientists use to study whales in the wild without disturbing them.
